B.Tech CSE undergraduate with a strong passion for web design, development, and data science. Known for my creativity, open-minded approach and eagerness to explore new technologies. I also bring excellent communication and social skills, enabling effective collaboration in team environments.

EDUCATION

- **CBSE CLASS 10 | GEMS United Indian School, Abu Dhabi, UAE** - Completed in 2021
- **CBSE CLASS 12 | Abu Dhabi Indian School, Abu Dhabi, UAE** - Completed in 2023
- **BTech Computer Science Engineering | IIIT Jabalpur, Madhya Pradesh, India** - 2023-present

EXPERIENCE

- **Intern @ TechSolnIx | April 2025 | (Duration : 4 weeks)**
  - Built a responsive personal portfolio website using HTML, CSS, and JavaScript.
  - Applied basic web design principles including layout structuring and styling with Flexbox/Grid.
  - Gained hands-on experience with JavaScript for interactivity and DOM manipulation.
  - Learned fundamentals of responsive design and debugging for cross-device compatibility.

- **Intern @ Belimo | May 2025 | (Duration : 1 week)**
  - Observed IT integration in HVAC systems, focusing on smart energy valves.
  - Understood basic concepts of the Niagara platform and BACnet MSTP protocol.
  - Learned how valve data is inputted and used to enable intelligent BMS.
  - Gained insight into data flow within building automation systems.
  - Analyzed the integration of IT systems in logistics, finance, and technical support operations within a corporate environment.

PROJECTS

- **HUMMUS - THE GAMERS HUB | August 2024**
  - Designed and developed a dynamic gaming community website using modern web technologies.
  - Enabled users to explore detailed information about PC games, including genres, ratings and descriptions.
  - Created a Real Time Chatbox, a bidirectional chat application to enable instant messaging between users.
  - Implemented personalized user profiles for tracking and showcasing played games.
  - Focused on intuitive UI/UX to enhance user engagement and accessibility.

- **MONKEY ESTATES – REAL ESTATE MANAGMENT SYSTEM | December 2024**
  - Designed and developed a Real Estate Management System to facilitate property listing and discovery.
  - Enabled users to list properties for sale and browse available listings with advanced filtering options.
  - Built features for property owners to manage property details and track maintenance requests.
  - Integrated functionality to monitor and manage active property insurance policies
  - Focused on scalability, usability, and efficient data management throughout the platform.

- **SMART FOOD RECIPE GENERATOR | May 2025**
  - Developed a Flask-based app enabling users to find recipes by ingredients or natural language queries using spaCy NLP.
  - Integrated TheMealDB API for real-time recipe data with detailed instructions and images.
  - Deployed via GitHub and Render with automated setup and dependency management.
  - Focused on delivering a smooth, user-friendly experience with advanced ingredient filtering.

SKILLS

- Full-Stack Web Development
- Web Design
- Problem Analysis and Solving
- Data Science
- Basic App Dev using Flutter
- Intro to Generative AI
- Innovative Thinking
- Exceptional Communication
- Time Management
- Data Analysis
- Basics of Object Detection
- Intro to Image Generation

TECHSTACK

- Frontend: HTML, CSS, JavaScript
- Backend: Node.js, Express.js , Python, Flask
- Coding Language: C, Python, Java, SQL
- Tools: Figma, Git, VS code, Canva, MongoDB
- Data Sci. & ML : Tensorflow, spaCy, Pandas, NumPy

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Tamil (Fluent)
- Japanese (Basic)
- Arabic (Basic)
