SUMMARY

B.Tech CSE undergraduate at IIITDM Jabalpur with a strong passion for Product Engineering, Machine Learning, and Data Analytics. Focused on bridging technical execution with product strategy through full-stack development and data-driven insights. *Actively seeking off-cycle internship opportunities in Software Engineering, Data Science, or Product Management.*

EXPERIENCE

Data Science Intern @ Evoastra Ventures | Remote June–Aug 2025

- Applied data analytics and ML techniques to real-world projects, including open car sales data analysis.
- Utilized Pandas and Scikit-learn to improve data processing efficiency for car sales datasets.
- Developed an image-based data extraction project; gained hands-on experience in visualization and model building.

IT Systems Intern @ Belimo | Dubai, UAE May 2025

- Observed IT integration in HVAC systems, focusing on Smart Energy Valves and BACnet MSTP protocol; learned how valve data enables intelligent BMS and drives automated data flow across building automation systems.
- Analyzed IT integration across logistics, finance, and technical operations in a corporate environment.

PROJECTS

CALIBR – Multifunctional Smart Scale | Lead Mobile Developer May 2026

- Engineered a Smart Scale replacing traditional geometry tools with an integrated hardware-software solution.
- Developed a mobile app using React Native, Expo, and TypeScript for real-time physical measurement tracking.
- Architected a PostgreSQL database to instantly store and sync measurements, eliminating manual data logging errors.
- Designed a high-contrast Always-Dark UI tailored for engineering environments to optimize visibility during precision tasks.

Sign Language to Text Application | Team Lead & Lead Developer August 2025

- Developed a real-time Sign Language to Text app using Python, OpenCV, Mediapipe, scikit-learn, tkinter.
- Designed a standalone Windows app with webcam-based gesture recognition.
- Created a custom dataset of ISL signs with pre-processing and evaluation; achieved ~97% accuracy.

MUNCHY – Food Delivery Website | Lead Developer June 2025

- Developed a full-stack food delivery platform with responsive UI using React.js (Vite).
- Built core features: user authentication, menu browsing, cart, and order tracking.
- Created a secure admin dashboard; integrated Stripe API for seamless payments.
- Implemented RESTful APIs with Node.js & Express, and used MongoDB for data storage.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React Native

Backend: Node.js, Express.js, Python, Flask

Languages: C, Python, Java, SQL, R, TypeScript

Tools: Figma, Git, VS Code, MongoDB, Tableau

Data Science & ML: TensorFlow, spaCy, Pandas, NumPy

Certifications: Google Data Analytics Professional Certificate

EDUCATION

B.Tech Computer Science Engineering | IIITDM Jabalpur, Madhya Pradesh, India Expected 2027

CBSE Class 12 | Abu Dhabi Indian School, Abu Dhabi, UAE | 2023

CBSE Class 10 | GEMS United Indian School, Abu Dhabi, UAE | 2021

Languages: English (Fluent) • Hindi (Fluent) • Tamil (Fluent) • Japanese (Basic) • Arabic (Basic)
